

Finance Associate (Business Informatics) - Vienna Based

Come and innovate for a medical technology company.

We believe in a future where healthcare is more accessible. That's why we work with specialised, self-motivated minds to develop and sell home testing systems that combine diagnostics technology with medical knowledge and data. To support the realisation of this vision we are searching for an internationally-minded Finance Associate with Business Informatics experience to join our growing team.

A little about your future role...

We offer a permanent position, based in Vienna, where you can grow professionally in an innovative, open, and future-oriented startup environment. As a member of the Finance Team, you will be in charge of the development, maintenance and support of existing sales and other ERP systems (especially webshop, BMD & POS system).

Main Duties & Responsibilities:

- Implementation and maintenance of in-house ERP processes.
- Design and optimization of API's to ensure communication with logistics, sales, administration & accounting/ finance.
- Assist the Sales & Finance Team with day to day operations and by working with the order and sales systems.
- Challenge the existing processes, solutions and suggestions, initiate and drive improvements.
- Support the geographical expansion and general scale up of order, sales and distribution channels.
- Work with the Sales Team on new concepts for order and sales processes and systems, while ensuring taxes, accounting and payment systems are compliant and optimized.
- Work with the Finance Team to implement and maintain tax, accounting and payment system requirements within the order and sales processing software.
- Explain the implemented solutions to the users of the system and support them in their work.

A little about you:

- Graduated in Information Technology, Business Informatics (Wirtschaftsinformatik) or equivalent. (HAK, HTL, FH, University)
- Previous knowledge with Java Script, HTML, PHP, CSS & CMS based systems.
- Previous experience with order processing (Shopify) or tax and accounting systems (BMD, SAP) highly desired.
- Ability to map vast numbers of factors and solutions and translate these into a meaningful IT landscape.
- Working with conditions, interdependencies and overriding rules to simplify the decision tree.
- Proficient with working on software solutions.
- Ability to communicate and explain complex concepts in a simple manner.
- Proficient in both written and verbal German and English highly desired.
- Operate independently to ensure work is completed to schedule and meets quality standards.
- Have a positive and resilient attitude, and the ability to be agile in unforeseen and adverse situations. even when encountering challenges.
- Comfortable working both independently and on a team, within a fast-paced and flexible work environment.
- Possess the necessary work permit for Austria.

Don't have experience with all the points above? Don't worry, we are big fans of learning, training and coaching on the job. Shoot us an email and explain how we can help each other grow.
